

Who We Are...

Ready is a business-focused engineering firm, established in Spruce Grove, Alberta in 1996 by Lee and Susan Ready, originally providing services to the utility power plants west of Edmonton. Today, we serve clients from offices across North America in industries that include biofuels, chemicals and fibers, mining, oil and gas, pulp and paper, special waste management, and nuclear, fossil, and green power generation. Ready meets its customers' concerns in projects such as power system designs, control system installations and upgrades, software verification and validation, and design, commissioning, and start-up support.

Each Ready employee understands their responsibility to perform, sell, or support the engineering services we provide, and has learned to leverage their innate talents in order to do so. Our relentless attention to client-centric consulting enables us to provide these engineering services within the framework of exceptional customer service, generating repeat business across North America and around the world.

The Results

Our unique, business-first mentality provides a foundation for our disciplined professionals to further their engineering interests by securing projects from some of the most sophisticated clients in the world. We are a recognized authority on utility-grade DCS, and Ready personnel have had the opportunity to work on nuclear projects like Generation III+ plants in China and a complete digital modernization project in Sweden. Ready has published and presented papers internationally and has won awards for both its specialized engineering services and its business performance. Our awards include:

- **2012 Consulting Engineers of Alberta Showcase Award of Excellence: International.** Ready completed over 25,000 man-hours of engineering services during the commissioning and startup of the Ringhals Unit 2 Nuclear Power Plant in Sweden.

- **2006, 2007, 2009, 2010, 2012, and 2013 PSMJ Circle of Excellence Award.** Measuring and comparing 13 benchmarks of over 200 engineering firms across North America, Ready is one of only *five firms* that have been so consistently appointed to the Circle of Excellence.
- **2005 Consulting Engineers of Alberta Showcase Award of Excellence: Software.** Ready created the most advanced coal blending software in the world.

- **2003 Alberta CIBC Small Business Award of Distinction.**
- **2002 Business of the Year.**
- **1999 New Business of the Year.**

With a proven track record and a strong understanding of the systematic practices that make us successful, Ready continues to expand its impact on the engineering industry.
