

Ready is an engineering industry leader, providing controls and electrical engineering expertise to heavy industrial facilities in North America and around the world.

Ready recognizes that our value to our customers rests in the skills and service we provide them. As such, Ready invests heavily in recruiting, training and retaining our specialized engineering personnel. With extremely low personnel turnover—less than five-percent—Ready's customers benefit from having this stable core of engineers available to them year after year: There is a comprehensive understanding of the client's facility, people and processes and a retained pool of plant specific knowledge, accessible to the client at any time.

ELECTRICAL ENGINEERING

- Complete Power Distribution Design from Substation to Load
- Power System Studies and Critical Equipment Protection Solutions
- RFQ Preparation and Evaluation
- Construction Work Packages
- Project Management and Documentation
- Commissioning and Start-up Experts

CONTROL SYSTEMS

- Migration and upgrades of large Controls, HMI and SCADA systems.
- Integration of 3rd party systems into plant controls.
